BUDGET STATEMENT 2004-2005

1. Introduction

In this year's Budget statement, I outline the next steps in our continuing reforms, and announce new targeted measures. Both consistency and focus must be applied to overcome global uncertainty and local difficulties, and to achieve our vision – our long-term social and economic goals. The setting for this year's budget is that our challenges have multiplied, but our people's needs have also continued to increase: the needs of our young people, our elders, families on very low incomes – and especially our people on the outer islands. We cannot, and will not, ignore those needs. We are making a concerted effort, through our policies and expenditures, to address these needs and we will enlist the support of our development partners in this endeavour.

2. Government's long term vision

So, at the outset, I would like remind you of the government's vision for the future of the people of this Kingdom.

It is the government's vision that, through the reform program steady progress will be made so that the people of Tonga will enjoy a high overall quality of life, with a high standard of living throughout the Kingdom. We will respect the options of both present and future generations through an adaptive culture, with high values. Our social and economic development structure will feature individual fulfilment, gender equity, political stability and a stable economic and financial environment.

This vision guides the government's macroeconomic policies and budget priorities.

3. Budget setting

i. Global Challenges

The climate of uncertainty which formed the background to the preparation of the budget last year has unfortunately continued into this year. Despite the declaration of the end of the official period of hostilities between the coalition forces and Iraq, fighting has continued, while the spectre of terrorism continues to place a cloud of apprehension over the financial and commodity markets. While the impact of SARS has been fortuitously blunted, political instability in the Middle East has resulted in the price of crude oil reaching record levels in the middle of May.

This changing and challenging global policy environment must be considered carefully. It has far reaching implications for our assumptions about future economic growth. Our relative physical isolation of the past has been reduced by the impact of globalisation. Today, policy decisions taken in far away places can have a dramatic effect on our domestic economy.

The global challenges come in many forms. The issue of terrorism and the related issue of border security within a framework of international and regional cooperation must be

given high priority. Our defence personnel are serving in the regional peace keeping forces in the Solomon Islands and may soon be deployed in Iraq. Our international obligations under the various United Nations resolutions must be maintained. These are not without cost, and must be financed from the national budget.

The issue of our dependence on remittances must also be considered carefully. Remittances are our largest source of overseas earnings and far outweigh our earnings from commodity exports, tourism and other activities. The growth of remittances has been dramatic in recent years but this should not be taken for granted. As time passes, the strength of relationships between Tongans in Tonga and those overseas are expected to weaken and with it the strength of remittances.

The dependence of the export sector on squash exports was drastically exposed last year when the prices of squash to growers fell to record lows. Some growers failed to receive any proceeds from their exports. Nationally, our total export receipts were pulled down by the lowered returns to this one industry. The sudden decline of fish catches also shows the vulnerability of the fishing industry to forces largely beyond its control. More recently, the financial difficulties faced by the national airline, Royal Tongan Airlines, echoed similar experiences in many other countries.

ii. Local Difficulties

It will be necessary to make short term sacrifices as we nurture our limited resources, if we are to build a fair and prosperous future for our young people of today.

The demographic structure of our society is changing and therefore our policy must be flexible to address these changes. Young people below the age of 21 comprise the majority of our total population. More young people are searching for work today than ever before. More young people are dropping out of school. More people are facing economic hardship in the outer islands. The rate of crime is increasing very rapidly. Drug abuse is also increasing. These are real issues on which we must focus.

A recent survey indicated that internal migration is causing economic hardship for those left behind in the outer islands. Furthermore, about a quarter of households surveyed were deemed to have weekly income below a notional benchmark for basic needs.

These are all factors which must be taken into account in the design of the budget, difficult though they are.

However, the government cannot resolve all the many economic and financial challenges facing the Kingdom in one step.

The government promises only to deliver steady progress and improvement on a step by step and year by year basis. It would be unrealistic to promise that which we cannot deliver.

4. Budget Theme

To pursue our vision in this setting, the theme of the budget for 2004/05 is to "achieve sustainable growth with social equity". To achieve sustainable growth we must maintain a

sound and stable financial environment with low inflation, adequate international reserves, and a sustainable overall budget position. In order to achieve these conditions we must continue with the economic and public sector reform we first embarked on in 2001, including the tax and public enterprise reforms. We must also reform the structure of our economy in order to create more jobs for our young people, and at the same time develop a flexible economy which can adapt rapidly to a changing global economic environment. With a strong flexible economy, we will be more able to address the needs of all the people of Tonga, especially the poor. The government is acutely aware of the economic hardship faced by certain sections of the community, particularly in the outer islands.

5. Economic Factors

I am now going to review in more detail the economic factors in this year's budget setting.

i. International economic situation

According to the International Monetary Fund, the global recovery has strengthened with global GDP growth averaging 6% at an annualized rate during the second half of 2003. This growth has continued into early 2004. This overall growth level masks wide regional differences. Growth is most rapid in Asia, especially China, and the United States. Growth in the European Union countries is not so strong with weak consumption growth. The IMF forecasts that growth in the G7 countries will increase from 2.2% in 2003 to 3.5% in 2004, which is well above the trend rate of 2.5%.

Of Tonga's main trading partners, the New Zealand economy continued its strong growth through the second half of 2003 and into early 2004. The current growth phase has averaged 3.7% over five years since 1999, which has been above the long run average. Strong growth in export markets led to strong domestic demand with strong growth in consumption and income. The Australian economy also grew rapidly over the second half of 2003, with GDP expanding at an annualized rate of 5.5%. This growth was based on strong domestic demand, with a strong increase in the rate of consumer spending. Export growth was also strong. The Japanese economy has been more promising than it has been for some time. Japan's GDP increased by 1.6% in the December quarter of 2003 reflecting strong growth in business investment and exports.

ii. Domestic economic situation

It is estimated that the economy grew by 2.9% in 2002/03, higher than the budget projection of 1.9%. This reflects strong activity in the agriculture, tourism, construction, transportation and communication sectors. However, poor performance in the agriculture sector in 2003, with low prices for squash exports, low fish catch rates and lower value added in the transportation, power and telecommunications sectors have caused our GDP estimates for 2003/04 to be lowered to 1.6% from our projection of 2.6% last year.

iii. Outlook for 2004/05

The outlook for 2004/05 is for GDP to grow by 2.8% with agriculture growth projected to form the foundation of a return to faster growth. This projection depends to a large extent on stability and impacts from the external market and the effectiveness of the government's

fiscal and monetary policy. The global economy is projected to grow by 4.6% in 2004 and by 4.4% in 2005. This will play a significant role in Tonga's performance in the medium term.

Imports continue to show a strong upward trend, based primarily on strong remittance growth, while exports overall show a slight upward trend. At the same time the government's financial position remains under pressure due to high expenditure commitments.

The current high rate of inflation is expected to stabilize around the 10% mark, although it is too early in the economic cycle to forecast any significant reduction in the current high rate. The external position is stronger than in previous years reflecting the disbursement of concessional external loans and the anticipated growth in remittances as the global economy strengthens. The gross official foreign reserves are projected to remain at current levels.

6. Macroeconomic management

The Government's monetary and fiscal policies will continue to be directed to the twin goals of long-term economic strength and medium-term economic stability.

i. Monetary policy

The two main policy objectives with regard to monetary policy are maintaining an internationally competitive level of inflation and secondly, maintaining the level of the gross official international reserves at a comfortable level, at between 3 to 4 months of import cover. Monetary policy has succeeded in achieving one of its two main targets, by maintaining the gross official international reserves at between 3 to 4 months of import cover. On the other hand, more needs to be done to bring about a low and sustainable level of inflation.

The rate of inflation has continued to be under upward pressure, rising from 10.7% in 2002/03 to an average of 11.6% by December 2003. This has been attributable to imported inflation, coupled with sharp increases in tax rates for imported alcohol and tobacco products. At the same time, the continued deficit position of the government's budget has added to overall aggregate demand, with added upward pressure on domestic demand, although this later eased as credit growth stabilized in the second half of 2003. It is expected that the level of inflation will stabilize at this level for 2004/05, although there is a risk that this assumption could be undermined with the price of crude oil reaching record levels by mid-May 2004. If the price of crude oil continues to rise, then it is expected that the rate of inflation will also rise for 2004/05.

The level of gross official foreign reserves improved in December 2004 and it is expected that this comfortable level will be maintained in 2004/05. The improvement was due in part to the drawdown by the government on its overseas lines of credit, as well as commercial banks seeking to finance the purchase of pa'anga to finance their lending operations.

The value of the pa'anga against the value of the US dollar appreciated during the first 9 months of 2003/04, while the value of the pa'anga against the Australian and New Zealand dollars declined during the same period. These changes have been caused by the

movements of capital and investor sentiment, factors which are essentially beyond the influence of government policy. The cost of paying for most of our imports has continued to increase and has contributed to the higher rate of inflation.

On the other hand, the lower exchange rate favours those sectors that rely on the exports of goods and services, which receive higher income.

Monetary policy has been maintained at a tight level in recent months in order to conserve the level of the foreign reserves. This will continue until such time as the gross official foreign reserves have increased to more comfortable levels.

ii. National Reserve Bank of Tonga

As part of strengthening the financial sector, the government will be tabling legislation to revise the Financial Institutions Act. This will enable the National Reserve Bank of Tonga to enhance its supervisory role over financial institutions and ensure that a high level of confidence is maintained by investors and depositors. The government is also considering amendments to the NRBT Act to strengthen its balance sheet and its operational authority so that it can react more effectively to potentially rapid changes in the financial environment.

iii. Tonga Development Bank

The Tonga Development Bank has performed above expectations in recent years. Through prudent lending policies, a focus on the productive side of the economy, and local knowledge and understanding of Tonga's development needs, the TDB makes a special economic contribution. To enable the TDB to increase its services to those sectors of the community who require special support, the government proposes to increase its capital contribution to the Bank in 2004/05. Furthermore, the government is studying other ways to build on the strengths of this local institution without weakening the commercial disciplines that are the key to the continuing success of the Bank and its business customers.

iv. Export credit guarantee scheme

In light of the recent challenges faced by the export sector, the government is considering the option of supporting our export industries by initiating an export credit guarantee scheme. It is expected that the scheme should provide assistance to exporters by guaranteeing receipts of their export proceeds against certain repayment risks. The government will seek the assistance of experts to develop the legal and operational framework for such a scheme.

7. Fiscal policy

The government has formulated a fiscally responsible budget for 2004/05 within the context which I have just outlined. As summarized in Table 1, the 2004/05 budget is based on an overall operating surplus of \$3.6 million. In addition, \$14.3 million will be invested in capital expenditure projects, primarily associated with the final phase of the Cyclone Waka infrastructure restoration in Vava'u and the Niuas and continuation of the health services improvement program, in particular, commencing construction of the new Vaiola Hospital. The financing of the -\$10.6 million overall budget balance will be achieved in cooperation

with our development partners, based on external concessional loan financing of \$5.5 million net and domestic financing through a \$3 million drawdown in government cash balances and a net \$2 million bond issue.

The full details of the revenue and expenditure components underpinning the budget aggregate figures are presented in Budget Statement Paper 2.

8. Reform priorities

I have made it clear that Tonga faces a rapidly changing global economy, and special local needs. Our macroeconomic policies will contribute to medium-term stability. But, for Tonga to succeed in achieving the vision for a more stable and prosperous future for our future generations, then we must continue the structural reforms we have started. Our economy must be able to provide new jobs for the 2,000 or so school leavers each year. To be able to do that our economy must be adaptable and dynamic. It also means that the present structure of the economy must be strengthened and made more robust. That is why the economic and public sector reforms are important.

One aim of the reforms is to make the public sector more efficient. This will improve the provision of basic services to the public, and reduce the level of taxation that the government needs to pay for the provision of these resources. The reduction in taxation will free up resources in the private sector for new investment, which in turn will create new employment opportunities for school leavers.

A second aim is to make public policies more effective, especially where they affect private sector performance. In practice this means that we must reform the direction and magnitude of the government's interventions in the economy to focus on the things that the government does best – delivering basic public services, strengthening community institutions, pooling and managing community knowledge and community risks, building the foundations for private sector activities, and leaving the private sector to make commercial judgements and bear commercial risks.

i. Agriculture sector

The agriculture sector has suffered its share of set backs in the past 12 months. It is clear that our high dependence on volatile returns from squash exports can be a constraint, in that when the squash market is affected by low prices, the performance of the whole export sector is seriously affected. In order to diversify the base of the export sector, the government has initiated the trials of domestic production of various types of vegetables for the export markets. This will be accelerated during the new financial year. The government is also actively seeking the assistance of donors to assist with the development of the agriculture sector through an enhanced policy environment and the development of small and medium agricultural enterprises.

ii. Fisheries sector

The government is considering new options to support the fisheries sector in the wake of the recent low catch rates during the current financial year. The experts cannot tell us when the tuna will return, but the government can and will work with the fisheries sector to help

improve and sustain the viability of the industry in these difficult times. The joint initiatives being considered include the issue of the declaration of the EEZ, exploring bilateral arrangements to expand the area of ocean available to the fishing industry, and re-assessing Government's policy interventions to ensure that they serve to support the industry.

iii. Tourism sector

The government will continue to increase its level of support to the tourism industry. At present the key challenge is the discontinuation of the domestic air service by Royal Tongan Airlines. The approach by the government is to seek private sector interests who wish to perform the provision of this service. This is a key change from the previous policy of maintaining a government-owned air service. At the same time, the government will consider options for attracting new investment into the sector. The performance of the industry in 2003/04 has been a factor in the growth of the economy.

iv. Building on success

I have had to talk about a number of difficulties that we face. Realism demands this. But we must not ignore or neglect the successes that Tongan people are achieving – often quietly and without attracting a lot of attention. These include the communities making progress at local level with addressing and solving some of our social challenges; the businesses making steady progress with sound commercial practices; the members of our religious and voluntary sector that are making a special contribution to that vision I summarised earlier. The government wants to help build on these community institutions and to pool community knowledge where this is compatible with commercial considerations – and most of these people are prepared to share their knowledge. If we can recognise, strengthen and spread these proven local successes, then we can accelerate the improvements that are needed.

v. Public sector

The reform of the public sector is an ongoing exercise. The first component of the reform is in the management of the government's finances.

▪ Financial management

Following the coming into effect of the Public Finance Management Act of 2002, the Ministry of Finance is continuing the introduction of modern methods of financial management. It is anticipated that during 2004/05 all government departments and ministries will be connected directly to the Ministry of Finance computer system to improve the management by ministries of their votes. New changes will also be brought into operation to make the payment of wages and salaries more efficient. This year we moved to integrate public enterprise funding requests into the annual budget process, and we will continue to integrate and strengthen the financial management processes for putting our policies into action. We will work with experts to improve the management of the government's financial balance sheet, to ensure that our borrowing and on-lending are soundly-based in terms of individual loans and the overall position.

- **Public service**

As of the 1st of July of 2004, heads of departments will be placed on contracts with associated performance indicators. This is intended to make the heads more accountable and responsible for the activities and outputs of their ministries, especially in relation to the resources made available to them through the budget estimates. The heads of departments will be required to accept more responsibility in terms of financial management as greater authorities will be delegated to them from the Ministry of Finance.

- **Public enterprises**

The programme for the reform of public enterprises will continue. Progress to date has been slowed by the need to deal with the financial implications of the termination of the services undertaken by Royal Tongan Airlines. Once this delay has been overcome, it is anticipated that other activities such as privatization of Sea Star Fishing Company Limited, Tonga Investment Limited and Leiola Duty Free Tonga Limited will be implemented. Furthermore it is expected that the corporatisation of the Post Office and the Printing Departments, which were delayed by legal and other issues, will be effective from 1 January 2005. The government will continue with the policy of progressive divestment of shares in public enterprises undertaking non-core government functions and the corporatisation of trading activities of ministries and departments such as the Talamahu Market Authority, and the Chronicle newspaper.

9. Social development policies

- **Youth**

The challenges posed by the issues of youth must be addressed effectively and urgently. There are increasing indicators of problems associated with unemployed youth, such as rising petty crimes, increasing teenage pregnancies, and increased drug related offences. This situation is exacerbated by internal migration with the bulk of the population of Tonga concentrated in the greater Nuku'alofa area. To address these challenges, the government will be considering new policy initiatives on training for young school leavers and dropouts as a matter of priority. The government has sought the support of bilateral and multilateral donors to initiate pilot projects, which if successful will form the foundation for a nation wide programme to provide new skills learning opportunities for the youth of today. Some of the options to be explored include possible apprenticeship programmes, and enhanced counselling services for young people leaving school.

- **Urban development**

The standard of services provided for greater Nuku'alofa area is a matter of concern to the government, and it is reviewing new policy options to address the issue of sanitation, drainage, roading, waste disposal, and other services. This is expected to be a large undertaking and the government has sought the assistance of donors.

- **Economic hardship**

The government will be accelerating the implementation of policies which provide for the basic needs those who face economic hardship, and those who live in rural areas. In

addition to the many projects funded by donors, the government, at the macro-economic level, is also implementing policies aimed at improving the services provided by ministries and departments and also at reducing taxes on imported goods. The implementation of projects for the health and education ministries in the outer islands will do much to alleviate hardship in these areas. At the same time the government will be reviewing options which will focus on specific groups, such as senior citizens.

10. Sectoral Spending Priorities

This budget continues to give priority to spending in law and order, education, health, and basic infrastructure. The allocations for operations and maintenance in these ministries are increased from last year. These are needed to ensure that they are better able to serve the public through the effective provision of government services, particularly to the outer islands.

- **Health**

The government is committed to provide quality health services through a programme of modernization of its services to meet current and potentially new demands from the public. The Ministry of Health has been allocated \$36.2 million in 2004/05 comprising of funds from the Tonga government and from foreign aid donors. A portion of this expenditure is for the construction of a new hospital with part to be financed by a loan from the World Bank and the balance from a grant from the Government of Japan. The allocation from the Tonga government funds is \$13.3 million with:

- \$1.1 million for the first phase of the reconstruction of Vaiola Hospital
- \$1.1 million for preventative health care and
- \$7.4 million curative health care.

- **Education**

Education continues to account for a large share of total expenditure with \$16.3 million allocated in 2004/05. The focus of government's efforts is to improve the quality of education at all levels. The major allocations for 2004/05 include:

- \$7.3 million for the provision of primary school services
- \$4.1 million for secondary school services
- \$700,000 for subsidy to non-government schools
- \$700,000 for scholarships for students at USP

- **Tourism**

Tourism is one of the key priority sectors for economic growth. The government is committed to undertaking joint marketing exercises with wholesalers support in New Zealand, Australia and the West Coast of the United States. The government is also continuing its endeavours to work with the private sector to expand investment in the

tourism sector. The government has commissioned a review of enhancing the resources available for marketing which will form the framework for financing future investment activity.

- **Agriculture**

The economy is predominantly agriculture based and it is important that the government gives priority to food and income security through the diversification of the agricultural product base. The major allocations for 2004/05 include:

- \$0.9 million for food security, safety and nutrition
- \$0.5 million for livestock production and import substitution
- \$0.2 million for forestry services

The government has commissioned a review of the domestic agriculture sector in order to formulate a long term policy framework. The review will focus on new policy directions and strategies.

- **Fisheries**

The fisheries sector is one of the three key priority sectors for government intervention to provide new employment opportunities as well as foreign exchange income. The major allocation for 2004/05 includes:

- \$179,000 for research and development
- \$100,000 for the administration of access and compliance

11. Tax changes

On 1 April 2005, the government plans to abolish the following taxes:

- Port and service tax (presently at 20%)
- Sales tax (presently at 5%)
- Fuel sales tax

They will be replaced by the Tonga Consumption Tax, levied at 15% of the value of goods and services. This tax would be collected primarily at the import stage and, with larger businesses, at the point of sale of imported or locally produced goods and services. Coupled to this would be a reworking of individual and corporate income tax to provide a fairer system with generally lower rates of tax and the abolition of Ports and Services Tax.

This is in line with the government's intention to ensure that the tax burden is spread as widely and fairly as possible, whilst maintaining simplicity.

The government will be tabling before the Legislative Assembly a revised Income Tax Bill to update the current act. At the same time the government is also updating the Customs and Excise Act, for tabling at a later date.

12. Conclusion

The budget lays the foundation for achieving the government's long term vision for the people of this Kingdom. This vision can only be achieved through patient hard work and sacrifice. The government must work together with the people of this Kingdom to secure a prosperous and fair future for the youth of today. It is only through a partnership of trust and mutual respect that the many of the challenges facing Tonga today can be overcome.

The government of Tonga is grateful to the people of Tonga for their trust and continued patience and to its overseas development partners for their continued assistance.

Notes to Statistical Tables

Financial years end in June.

Tables A1 - C2, Pages S1 - S18

Monetary data are sometimes adjusted to incorporate revisions received from the domestic banking system.

Tables A1 - B7, Pages S1 - S16

Monetary data in these tables had been revised back to 1996 in July 2003.

Table A1 - Pages S1 - S2

1. Comprises consolidated balance sheet of the NRBT and the commercial banks.
2. This includes the holdings of the Reserve Bank and the commercial banks.
3. Nonmonetary financial institutions (NMFI) are those which do not combine the taking of deposits with the extension of credit.

Table A2 - Pages S3 - S4

1. Comprises the consolidated balance sheet of the NRBT, commercial banks and the NMFI.
2. These data may differ slightly from the comparable data shown on Statistical Table S2 because of savings deposit holdings of the NMFI in the two Niua.
3. Comprises bills and promissory notes issued by financial sector and held outside that sector.
4. Represents borrowing by Government from foreign sources for onlending to NMFI.

Table A3 - Page S5

1. Non-Financial Public Enterprises.
2. Non-Monetary Financial Institutions.

Table A4 - Page S6

1. Includes pre-decimal issues and a minor value of 50 seniti notes.
2. Includes pre-decimal issues and a minor value of \$1 and \$2 coins.

Table B1 - Pages S7 - S8

1. In March 1993, NRBT introduced a Required Reserve deposit for commercial banks. This was revised in December 1995, in September 1998, and in September 2000.
2. In April 1993, NRBT replaced Term Deposits of commercial banks with NRBT Notes.

Table B2 - Pages S9 - S10

1. These data sometimes differ slightly from the comparable data shown on Statistical Table S15.

Table B3 - Pages S11 - S12

1. These data sometimes differ slightly from the comparable data shown on Statistical Table S16.

2. Direct borrowing by NMFI from foreign sources. Some exchange risk is assumed by Government.
3. Represents borrowing by Government from foreign sources for onlending to NMFI. Exchange risk is carried by Government.

Table B5 - Page S14

1. Data exclude deposits held by the Government.

Table B6 - Page S15

1. Includes lending to the manufacturing, transport and communications, commerce and trade, construction, and services sectors.
2. Includes nonprofit bodies.

Table B7 - Page S16

1. Non-Financial Public Entities.
2. Includes lending to the manufacturing, transport, and communications, commerce and trade, construction, and services sectors.

Table C1 - Page S17

1. Interest rates listed are those available to general customers & to statutory boards.
2. This reflects average commercial bank published interest rates paid for savings deposits and for 3 to 48 month term deposits, weighted according to the amounts in these categories.

Table C2 - Page S18

1. Base rate is lowest rate charged. Prior to the December quarter 1992, this was the preferential rate. This is the average minimum prime rate published by the commercial banks.
2. This refers to the average minimum rate published by the commercial banks on their residential housing loans.
3. Apply to loans for export-oriented industries, manufacturing & raw materials processing, and tourism activities except restaurants.
4. This is the maximum rate published by the NMFI on their business loans.
5. Loans less than \$1,000 for activity in agriculture, fisheries and livestock.

Table C3 - Page S19

1. Short Term: Three months Treasury Bills except for Japan, Private Bill Rate.
2. Long Term Government Bonds: Ten year Government Bonds except for Australia, Treasury Bonds : 15 years.

Table D1 - Page S20

1. End-period, minimum retail price per litre of petrol sold by major distributors in Nuku'alofa, including sales tax.
- End-period, most common (level 2) rate group including any surcharges.

Table D2 - Page S21

1. Data reflect the recorded values of Tongan agricultural products sold in Talamahu Market, the largest market in the Kingdom. The quality of these data, particularly in earlier periods, is suspect and should be used with care. In addition, as it is likely that this market is covering a declining share of the total trade in these products, longer-term trends should be interpreted with care.
2. Comprising kape, cassava, taro, yams, sweet potatoes and mixed foods.

Table D2 - D4, Page S21 - S23

These data had been revised back to December 2000 in March 2001 to incorporate minor adjustment of data.

Table D3 - Page S22

1. Comprising kape, cassava, taro, yams, sweet potatoes and mixed foods.

Table D4 - Page S23

1. Comprising kape, cassava, taro, yams, sweet potatoes and mixed foods.

Table D5 - Page S24

1. CPI as published by the Statistics Department. The base period of November 2002 = 100.

Table E1 - Page S25

This table had been revised to incorporate latest update to original estimates.

1. Source: Ministry of Finance Budget Statement Documents.

Table E2 - Page S26

This table had been revised back to 2000/01 to reflect latest update to original estimates.

1. Groupings are those used by Statistics Department in Statistical Abstract, 1987.
2. Includes Government Supplies.
3. Source: Ministry of Finance Budget Statement Documents.

Table E3 - Page S27

1. Comprises Cable & Wireless loan in Tongan Pa'anga.

Table E4 - Page S27

1. Comprises Tonga Broadcasting Commission and Primary Produce Export Limited (PPEL).
2. Source: Ministry of Finance Budget Statement Documents.

Table F1 - Page S28

This table had been revised to reflect update of Trade date particularly the month of import cover.

1. Prior to the establishment of the NRBT, these assets were held by the Commissioners of Currency, the Commissioners of Coinage, Treasury and the BoT. This includes only the holdings of the Reserve Bank.
2. Imports, cif. in the year to date concerned. Where latest data is not yet available this is estimated by NRBT.

Table F2 - Page S29

1. This is NRBT's own estimates based on the Overseas Exchange Transactions (OET) records.
2. Data has been partially reclassified into official capital and financial inflows.
3. Corrections for March 2003 annual totals, other items net and overall balance.

Table F3 - Page S30

1. Comprising kape, cassava, taro, yams, sweet potatoes and 'mixed' foods.
2. Includes kava exports.

Table F4 - Page S31

Comprise kape, cassava, taro, yams, sweet potatoes and mixed foods. Given the non-homogenous nature of the group, movements in unit values should be assessed with caution.

Table F5 - Page S32

1. Including Hawaii and American Samoa.

Table F6 - Page S33

1. Data should be used with caution on account of difficulty separating tourist receipts from private remittances.
2. Recent data provided from the Tonga Visitors Bureau are provisional and are updated when available.

Table F7 - Page S34

1. Using the new HS (Harmonized System) it had an effect on the categories. Due to the introduction of the new HS in replacement of the SITC system, changes were made to all the categories of imports.

Table F8 - Page S35

1. Imports under aid or grants.

Table F10 - Page S37

Given the non-homogenous nature of some of these categories, movements in unit values should be assessed with extreme caution.

1. Comprises all categories of SITC code 732 for which volume data are collected. Unit values are affected by changes in the composition of these imports.

Table F11 - Page S38

1. Including Hawaii and American Samoa.

Table F13 & F14 - Page S40 & S41

1. The calculation of the bilateral exchange rates is based on the average of the mid-points published by the commercial banks for the concerned period.

2. On the 1st January 1999, the “euro” became the official currency for 11 European countries: Germany; France; Belgium; Spain; Ireland; Italy; Luxemburg; the Netherlands; Austria; Portugal and Finland.

Table F15 - Page S42

Note: These indices measure inflation in Tonga against those in the nominated countries adjusted for exchange rate movements. Each index measures the relative competitiveness between Tonga and the country specified. Increases in the index indicate that Tonga is becoming less competitive.

This table was revised in March 2002 going back to 1995 to incorporate linking inconsistencies.

1. The nominal effective exchange rate index represents movements in the average of bilateral exchange rates with the pa’anga, weighted by current account shares.
2. The real effective exchange rate index measures the competitiveness of the Tongan economy against the countries specified weighted by their shares in Tonga’s trade in goods and services.

Table G1 - Page S43

Quarterly series are seasonally adjusted quarterly percent changes at annual rates.

1. Real GDP growth for 1994/95 - 1998/99 has been revised in the 1999/2000 Budget Statement.
2. Calendar year, i.e. 1996/97 equals 1997.
3. Financial years end in March.
