PRESS RELEASE

National Reserve Bank of Tonga: Monetary Policy Setting

The Board of the National Reserve Bank of Tonga has decided to reintroduce credit ceilings for individual banks. The move is aimed at dampening credit growth to a more sustainable pace in order to protect the level of foreign reserves. A tightening in monetary conditions was foreshadowed in the Reserve Bank's 2004/05 Annual Report.

The decision has been made against a background of rapid growth in credit to the private sector, with few signs that the pace is easing. Over the year to November 2005, lending to the household sector increased by 45 percent, while lending to the business sector increased by 32 percent.

The increase in credit has underpinned strong growth in imports at a time when the level of exports is stagnant and net remittances have eased. This has led to a fall in foreign reserves from a peak of 5.4 months of imports at the end of 2004 to 4.3 months of imports at the end of November 2005. While this is within the level that the Bank considers as adequate (3-4 months of imports), the outlook for the next six months is for the level of official foreign reserves to decline further.

The Bank is also mindful that the higher civil servants' salaries are likely to underpin continued strong growth in credit, leading to further downward pressure on foreign reserves and upward pressure on inflation.

The Reserve Bank believes that a tightening of monetary conditions now is in the best interests of achieving long-term macroeconomic stability. The Reserve Bank will continue to monitor monetary conditions in light of the fiscal policy stance of the Government.

PRESS RELEASE

National Reserve Bank of Tonga: Monetary Policy Statement

On Friday 3rd March 2006, the Governor Mrs Siosi Mafi, announced that the National Reserve Bank of Tonga will commence issuing Reserve Bank Notes this month. This is part of a move towards placing greater reliance on market-based instruments in the conduct of monetary policy. The use of market instruments is aimed at improving the Reserve Bank's ability to manage liquidity and enhancing the efficiency of the banking system.

The Reserve Bank first issued Reserve Bank Notes in April 1993 but due to the high cost, refrained from issuing Notes in March 2001. The improved capital position of the Reserve Bank means that Notes can again be used to manage liquidity. This move will supplement the existing credit ceilings announced in January 2006.

Consistent with moving towards the use of market-based instruments, the Reserve Bank has reduced the Required Reserves Ratio from 15 per cent to 12.5 per cent effective 3 March 2006.

The Reserve Bank will continue to monitor developments in the coming months to ensure that the level of foreign reserves remains above 3 months of import cover.

Mrs Mafi concluded that the Reserve Bank is confident that these changes are in the best interests of promoting macroeconomic stability and a sound financial system.

Note: These indices measure inflation in Tonga against those in the nominated countries adjusted for exchange rate movements. Each index measures the relative competitiveness between Tonga and the country specified. Increases in the index indicate that Tonga is becoming less competitive. This table was revised in March 2002 going back to 1995 to incorporate linking inconsistencies.

1. The nominal effective exchange rate index represents movements in the average of bilateral exchange rates with the pa'anga, weighted by current account shares.
2. The real effective exchange rate index measures the competitiveness of the Tongan economy against the countries specified weighted by their shares in Tonga's trade in goods and services.
